

SEATTLE ARCHITECTURE FOUNDATION
SHAPE SEATTLE!

Whether it's on the walls of our alleys, an unexpected street corner or along city rooftops, encountering art in our streets causes us to see our surroundings in new ways without ever having to set foot in a gallery. Government ordained, developer sanctioned or on the fly and in the middle of night, art as it appears in public is a powerful purveyor of dialogue. A diverse group of art and design professionals speak to the presence of public art in Seattle and the means by which Seattle's story can be traced today and tomorrow.
