UPCOMING DESIGN IN DEPTH TALKS
At the Center for Architecture & Design

NEIGHBORHOODS MATTER | NORTH & SOUTH
What draws you to a neighborhood and what keeps you there? Lively downtown main streets that promote locally owned shops and restaurants close to public transit are key. Hear how design, community advocacy and other amenities keep these neighborhoods on the outskirts thriving.

May 16 - Columbia City
June 20 - Greenwood

PNW MATERIALITY
BUILDING TECHNOLOGY OF SEATTLE’S PAST
03.21.17 | Center for Architecture & Design | 1010 Western Ave
Reception 5:30-6:30, Lecture 6:30 – 8:00PM

Materiality, a part of our living environment that has been influencing our experience since the beginning of time. Just as the look and feel of a cave wall providing shelter shaped how a cave person may have felt in their living space, the materials used in built structures today, both inside and out, influence our encounters with the spaces we occupy. Come take a journey through history as we learn about materials in the PNW that truly give us a sense of time and space and how everything from technology to sustainability to our own personal tastes have influenced their evolution.

FEATURING:
LARRY KREISMAN
Program Director, Historic Seattle

ANNE SCHOPF
Design Partner, Mahlum Architects

>> Share your notes and photos from tonight’s lecture #DesignInDepth
JASON LEAR, MODERATOR
Principal, Batt + Lear

Jason Lear is founder and Principal of Batt + Lear, a company that has become one of the leaders of Seattle’s green building movement. Batt + Lear builds high-performance, deep green buildings. The firm’s work spans residential and commercial, both new construction and remodel, and every project is a sustainable project. In recent years, the firm has certified projects 5-star Built Green, Passive House, LEED Platinum and DOE Net-Zero-Energy Ready. As Principal in charge of design, Jason has focused his own learning on the ways that building systems work together. This learning has resulted in a significant knowledge base around building science and systems that work, as well as the importance of both a holistic approach to building and attention to detail in every step. Jason believes we have the opportunity to make our existing buildings and new buildings massively more energy efficient and much longer lasting. He does not believe in a Silver Bullet approach; rather, he recommends treating a building as the complex system that it is and applying simple systems, and excellence in construction, to make that building work better. Jason loves building green and has a contagious passion for sharing that love.

ANNE SCHOPF
Design Partner, Mahlum Architects

Anne Schopf FAIA is Design Partner at Mahlum Architects, a 78-year-old architectural firm with offices in Seattle, Washington and Portland, Oregon. Under her leadership, Mahlum received the 2014 Firm Award from the American Institute of Architects Northwest and Pacific Region (AIA NWPR). Mahlum is respected for its thoughtful, community-oriented work serving educational, healthcare, and private clients. In addition, Anne was the 2013 recipient of the AIA NWPR Medal of Honor, recognizing excellence in design, the practice of architecture, architectural education, and service to the profession; and two of her projects at Mahlum have been recognized with AIA Committee on the Environment (COTE) Top Ten Green Projects Awards. Since 2007, Anne has been actively involved with the AIA’s Committee on Design (COD) and AIA Seattle.

LARRY KREISMAN
Program Director, Historic Seattle

Lawrence Kreisman is an architectural historian, author, preservation consultant and, since 1997, has been Program Director for Historic Seattle. His most recent publications are Tradition and Change on Seattle’s First Hill: Propriety, Profanity, Pills, and Preservation (Historic Seattle, 2014), for which he served as Editor and author, and David: The Graphics Works (Pomegranate Communications, 2012). Mr. Kreisman and Glenn Mason authored The Arts and Crafts Movement in the Pacific Northwest (Timber Press, 2007) and curated the exhibit of the same name that circulated throughout Washington State from 2009 to 2011. Kreisman is also author of Made to Last: Historic Preservation in Seattle and King County, The Stimson Legacy: Architecture in the Urban West, The Bloedel Reserve: Gardens in the Forest, Historic Preservation in Seattle, Apartments by Anhalt, Art Deco Seattle, and West Queen Anne School: Renaissance of a Landmark. From 1988 to 2012, he wrote design features and cover stories regularly for the Seattle Times Pacific Northwest Magazine, as well as articles for Old House Journal, Old House Interiors, Arts & Crafts Homes and the Revival, American Bungalow, and Style 1900, where he was Contributing Editor.

Join us for the second part of PNW Materiality

MATERIALS OF THE FUTURE
April 18 - 6:30 -8 pm
Reception at 5:30

We’ve come to know Seattle as an innovation hub in the digital information age, but where does Seattle rank as an innovator of building construction & material technology across the globe? How will technological advancements in 3D printing shape construction in the future? Will existing building techniques using concrete & steel be replaced with renewable methods using Cross Laminated Timber? Join us as we explore building case studies, both local and around the world, to understand the material and construction process advancements that are influencing the next generation of buildings.

Confirmed Speakers:
AMIR LOFTI - CallisonRTKL
SETION BRANKO - Gensler
JASON LEAR - Batt + Lear (Moderator)
